

MARIUS AURENTI

ANTI-LIMESCALE CLEANER CONCENTRATE

Cleans and descales all types of surfaces

DESCRIPTION

Developed for professional use in sanitary environments, Marius Aurenti Anti-Limescale Cleaner Concentrate is a powerful descaling cleaner. It eliminates soap scum and limescale, leaving surfaces perfectly clean. It is ideal for cleaning countertops, tiles, faucets, sinks, bathtubs, and toilets.

INSTRUCTIONS FOR USE

Spray Marius Aurenti Anti-Limescale Cleaner Concentrate onto the surface to be cleaned. Distribute evenly with a damp sponge and allow it to work for a few minutes. Rinse with clean water.

TECHNICAL PROPERTIES

Appearance: liquid

Density at 20°C: 0.99

Biodegradability: over 90%

pH: 1.3

Prevent soiling!

For example, a floor mat will help prevent stains, particularly at ground-level entrances. Proper maintenance of microcement requires a multi-step cleaning process.

1. For your varnished microcement interiors

Remove dust using a vacuum cleaner fitted with a brush attachment.

Clean with Marius Aurenti Floor Cleaning Concentrate and water. Follow the recommended dilution carefully, as this is a highly concentrated product.

Mop the floor thoroughly. For larger areas, a floor scrubber or single-disc machine with a suitable pad can be used.

Change the cleaning water regularly, using hot or warm water.

Do not expose the coating to water or steam temperatures exceeding 80°C.

Rinsing with water helps remove cleaning-product residue that can build up and soil the floor over time.

Clean white limescale stains with Marius Aurenti Anti-Limescale Cleaner Concentrate and rinse with water.

Clean areas with the heaviest grease buildup (countertop, kitchen floor, etc.) with the Multi-Purpose Degreasing Cleaner Concentrate diluted to 1–2% and rinse with water.

Clean stubborn surface marks, such as black shoe marks, with a red abrasive sponge or a sponge specifically designed for enamel or glass-ceramic cooktops. Green sponges can scratch varnished surfaces.

Do not use black soap, linseed oil, or other conditioning products, as they may cause buildup.

2. For wax-finished interiors

Use the same cleaning method as for varnished microcement interiors. However, we recommend renewing the wax after cleaning by applying a coat of Spray Wax and spreading it with an applicator mop or paint mitt. This can be done with a floor polisher or a single-disc machine with a suitable pad.

MARIUS AURENTI

For 40 years, Marius Aurenti has been innovating to improve the performance of decorative materials and the sensations they provide.

A mineral and plant aesthetic, close to Nature, to which our works pay homage and for which our environmental commitment is total.

MA's is also present, through its training and support, alongside quality French craftsmanship which, every day in our workshops as well as in the field, strives to make each place unique, beautiful and timeless.
